

## **What if Jim Cathcart worked at your company?**

If I were in your Virtual Corner Office as your Onsite Mentor,  
Or if I were a member of your Remote Faculty:

**How much better could you be with some expert input day to day?**

Put me on your executive team, for real.

Each year I take on a very small number of clients for full hands-on involvement in helping them grow their business.

This means I attend occasional team or board meetings, coach your key people, conduct training programs for your people, chat with you privately about your issues or challenges, contribute articles for your publications, speak at your annual convention, and provide training materials and videos as needed. In other words, it's as if I had a corner office in your business and was available to you whenever you needed me for a quick chat or a lengthy consultation.

**Let's set up a call to see if this makes sense for you.**

I can only accept a few full clients but it's great when it happens.

I've done this throughout my career and even my first Primary Client was able to grow sales from \$17 million to over \$231 million in 5 years. I've worked with Insurance Companies/Agencies, Auto Service Companies (in Canada), Associations, Conference Center and Hotel Companies, Offshore Oil Production, Real Estate Franchise Companies, Technology Start Ups, Country Clubs, Healthcare Providers and Manufacturers, national and international Civic Club organizations, Banks and Banking Associations, and Professional Speakers and Trainers.

Let's talk about making me your Virtual VP, Onsite Mentor whether virtually or physically. Don't try to do this alone, let me "have your back." I might be your best go-to guy for 2021.

Does this make good financial sense for you?

Think of this: Instead, if you were to hire one new Admin Assistant or Secretary, it would cost (on average) \$20 an hour plus benefits.

That's \$41,600 per year plus about 30% for benefits, overall, around

\$50,000. Then you'd have to train, motivate and supervise them, provide a workspace and tools like a computer and business phone. Plus, it would be very difficult to fire them. It takes most new employees more than 3 months on the job (being paid) before they become valuable enough to justify hiring them.

Even then, what would the value or scope of their contribution be when compared to what I might be able to offer? Plus, with me, no training is necessary (I'll get the information I need to understand and grow your business), no motivation is required, I'm already motivated to help you. No office space, no benefits package, no careful supervision, and I can be "let go" within 30 days. Wow!
